

JHR Network Rule CNWT 304 TOA

This Safety Alert is to provide instructions and reinforcement of the JHR Network Rules and Procedures.

The following extract from JHR Network Rule CNWT 304 TOA, is a reminder that qualified workers using a TOA, must not include associated rail traffic when multiple worksites are required.

Multiple Worksites

If there is more than one worksite within the limits of the TOA, worksites must:

- have three Railway Track Signals and red flags/red lights placed at least 500m on each side of each worksite, and
- be recorded within the Worksite Protection Plan, and
- **not include associated rail traffic.**
