Train Numbering – Introduction

TfNSW is the owner of all train numbering in New South Wales and will be responsible for the issue of all train numbers to operators.

Freight trains will retain their original number for the entire journey even when travelling in the Up or Down direction. Train numbers will be either direction-based or origin-based primarily reflecting the operations district of origin and destination.

Through running intrastate freight services will be allocated an even number when commencing an UP journey and an odd number when commencing a DOWN journey.

Examples:

Examples of train numbering

Table 1 – Examples of train numbering

1.	BB27 'UP'	Port Kembla to Meeks Road Junction
	BB27	Meeks Road Junction to Baal Bone
2.	TB435 'UP'	Kooragang to Teralba Colliery
	TB434 'DN'	Teralba Colliery to Port Waratah
3.	4922	Morandoo to Meeks Rd Junction
	4922 'DN'	Meeks Rd Junction to Port Kembla

The letters DN and UP do not apply and are not used when the following occurs:

- an odd numbered train is travelling in the traditional down direction away from Sydney
- when an even numbered train is travelling in the traditional up direction towards Sydney

Odds and Evens – The current system of odd for down and even for up trains will still apply for trains that are not through running. Exceptions to odd for down and even for up are covered by the 'UP' or 'DN' indicators.

Note: Coal services are indicated by Odd numbers for empty services and Even numbers for loaded services.

Light locomotives

A light locomotive can run either alone or in association with a particular train.

Note: Heritage Light Locomotive numbering is shown on page 5.

ANNN – 1 st Character <i>Locomotive type</i>			
D	Diesel	X	Electric #

Light locomotive movements comprising mixed locomotives that include ELECTRIC locomotive(s) are to use the letter 'X' to avoid the possibility of electric locomotive being turned onto unwired roads, or sections of track from which the current has been removed. This will apply with the pantographs in the raised or lowered positions.

ANNN – 2 nd Character <i>District that the locomotive originated from</i>			
1	Sydney Trains Network	6	North Coast
2	Goulburn	7	Lithgow – Merrygoen
3	Junee	8	Orange
4	Newcastle	9	Illawarra
5	Werris Creek		

Non-associated movements

When a light locomotive is not associated with any particular train the last 3 characters, (following D, X or Z) will be as per the allocation for the Operator concerned as depicted under Intrastate trains for the area concerned.

Associated movements

Light locomotive association can happen in any of the following cases:

- when the locomotive having being rostered to work a particular train, is now going to or from that train, the light locomotive uses the last 3 alpha / numeric of the train that it is going onto or coming off
- when the locomotive is using a path that has been assigned to a cancelled train, the light locomotive will use the last three alpha / numeric of that cancelled train
- when the locomotive is taken off a train to assist another train, the light locomotive movement would retain the last three alpha / numeric of the train it came off
- when an unassigned locomotive is sent to assist or to bank/pilot a train, the light locomotive will use the last three alpha / numeric of the train it is sent out to assist or bank
